1 Introduction

Start your intro here

Citing multiple authors' works like this (see Brüderl et al., 2024; Huinink et al., 2011; Kreyenfeld et al., 2013) or a single one (refer to Schneider et al., 2021). However, citing the author in the text appears as follows: Bozoyan et al. (2021). Furthermore, to cite a specific page, you will need: (see Goldin et al., 2024, p. XX).

Add as many paragraphs as you need.

Referring to different sections in texts: This thesis comprises eight sections, commencing with this introduction, and is structured as follows. **Section 2** provides a literature review based on ... . Moreover, **Section 3** delves in ... . A descriptive analysis is performed in **Section 4**, aiming to identify trends and relationships in the data before conducting the subsequent econometric methods described in **Section 5**. Furthermore, **Section 6** proceeds to interpret the results from the base models, whereas **Section 7** provides further analysis, such as the mechanisms and extra robustness checks. Finally, this thesis concludes with **Section 8**, which further discusses the limitations and sets the stage for future research on the topic.

2 Literature Review

Start your literature review here. Note the guidance on correctly citing in the introduction.

2.1 Subtopic1

Remember, in the case of subsections, always at least two are needed. Otherwise, you do not need them and may proceed to the next section.

2.2 Subtopic2

Continue...

2.3 Subtopic3

Continue...

3 Empirical Data

3.1 Name of your Dataset

E.g., this thesis analyses the XX waves of the YY dataset...

3.2 DF's Inconveniences

As noted in the introduction, this subsection describes any inconveniences encountered during the data preparation ... .

3.3 Dependent Variables

Describe your dependent vars in a paragraph format: *Dep Var 1*: I use ... .

Dep Var 2: More so ... .

Dep Var 3: Continue ... .

3.4 Independent Variables

In my thesis, having ... .

Starting a table looks, e.g., so:

Table 1: **Sample Size**

	Panel A				Panel B			
	Females		Males		Females		Males	
	N	%	N	%	N	%	N	%
Category1:								
Dep Var 1	2,444	47.64	2,218	43.16	4.899	49.06	4.042	40.48
Category2:								
Dep Var 2	2,544	49.50	2,337	45.48	5,232	52.40	4,305	43.11
Category3:								
Dep Var 3	2,651	51.59	2,470	48.06	5,448	54.56	4,529	45.36
Observations	2,653	51.75	2,474	48.25	5,451	54.59	4,534	45.41

Source: ADD YOUR SOURCE.
Notes: Add Notes if needed. e.g., your p-value significant starts explained.

This is how an element from the appendix can be referenced (see **Appendix A1**).

3.5 Final Samples

Your data after all the cleaning, manipulation, and transformation is done.

4 Descriptive Analysis

Start here with some descriptive analysis.

4.1 Subtopic1

Adding some figures **Figure 1**.

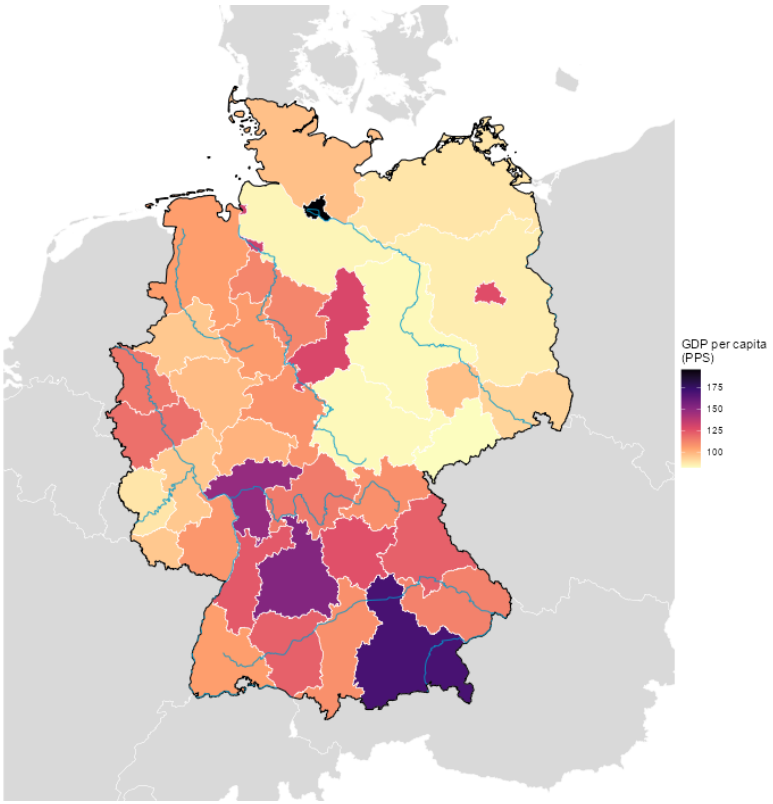

Figure 1: **Name of the figure**

4.2 Subtopic2

Continue...

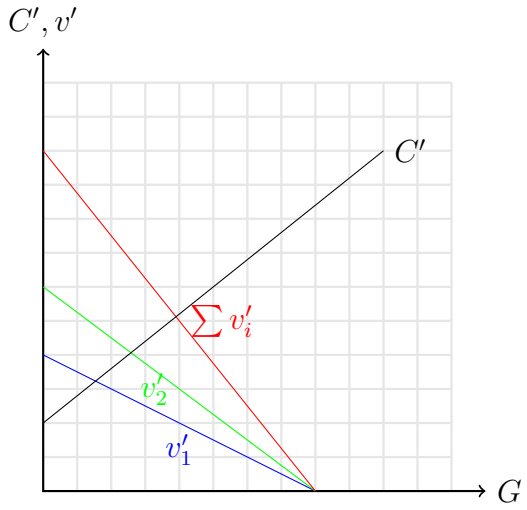
4.3 Subtopic3

Continue...

5 Empirical Methodology

As briefly discussed in **Subsection 3.3**, this thesis employs ... :

introducing TikZ:



5.1 Model 1

In the first empirical model, I define Y_{it} as the dependent variable for individual i at time t. For this model, the dependent variables are the *Dep Var 1*, ... :

$$Y_{it} = \alpha_i + \beta_1 \text{DepVar1}_{it} + \beta' X'_{it} + \epsilon_{it} \tag{1}$$

Moreover, the model incorporates the vector X'_{it}, which includes control variables to improve the precision of the estimates ...

5.2 Model 2

Analog to above...

6 Base Results

In this section, I focus on the effects of ... .

6.1 Category 1

Dep Var 1: In examining the impact of ... .

6.2 Category 2

Dep Var 2: When exploring the ... .

6.3 Category 3

Dep Var 3: The last outcome of interest is ... .

7 Further Analysis

7.1 Mechanisms

As reviewed, the heterogeneity of ... .

7.1.1 Mechanism 1

Dep Var 1/2/3: After ... .

7.1.2 Mechanism 2

Dep Var 1/2/3: The coefficients for ... .

7.2 Further Robustness Checks

Text starts here

7.2.1 Robustness 1

Dep Var 1/2/3: With the addition of ... .

7.2.2 Robustness 2

Dep Var 1/2/3: There are some remarkable differences after ... .

8 Discussion

This thesis aimed to explore the research gaps regarding ... .

Appendices

Table A1: **Descriptive Statistics**

	Females		Males	
	Mean	SD	Mean	SD
Main Outcomes of Interest:				
Dep Var 1	7.80	(0.62)	7.82	(0.69)
Dep Var 2	6.88	(0.75)	7.44	(0.75)
Dep Var 3	73.66	(44.06)	83.77	(36.88)
Background Characteristics:				
Var1	24.27	(42.88)	44.30	(49.68)
Var2	45.42	(49.80)	41.55	(49.29)
Var3 (%)	24.20	(42.84)	34.36	(47.50)
Var4	12.46	(3.34)	12.65	(3.21)
Observations	2,653		2,474

Declaration of Authorship

I hereby declare that I have not used any sources or aids (including AI-based applications or tools) other than those specified. All verbatim or analogous citations and quotations are identified and verified. I confirm that I have not used any aids that the examiner has explicitly excluded. I have documented the AI tools used in the section "Use of AI tools". In addition, I have listed all LLM-generated prompts and outputs relevant to the task in the above-mentioned section.

I further declare that I have not submitted this paper, in part or whole, to any other chair or institution in order to obtain a grade. I am aware that a violation of the above points has consequences under the examination law and may, in particular, result in the coursework and examination being assessed as "failed". Enrolment can be revoked for up to two years if students cheat twice or more frequently in examinations (Section 69 (4) and (5) HochSchG).
